Thillai Aadi Valli Ammai Uni5 center - Poraiyar - Nagapattinam Dt

Report of June 2014

The center has stepped into third year. We have now 15 children from very under developed fishery area of this village. But now the children looked very smart, well dressed and coming with real interest to the school. Grade one children who left us this year also very often come to the Uni5 environment and listen to few concepts and work with materials. The time and power of focusing of the children has been increased. The class room looks very clean and neat. The senior staff Ms.Mahalaxmi after her child birth met us and said that she will be back in September. Other staff Ms.Kavitha is also doing well. She has really taken interest in settling the fresh children and makes them to work regularly. She is now studying the manual and Uni5 syllabus. She has requested for few steel racks and shoe racks for making more space for the children to work. This will be provided soon. She is being asked to go through the monthly Uni5 syllabus prepared by other two centers and asked to take training through phone from Shanthi and Hema. Ms.SumathySivakumar will be guiding her on all Fridays to plan her forth coming week. We need to accept that we need a person officially to work as an educational coordinator to observe, guide and take over the Uni5 system in Poraiyar when Mr.Venkatesan the correspondent has given a freedom to do it. In September, new Uni5 center will be opened for the town children inside Aandavar School. Let us plan and make changes.
